

Experiment 10 – Paging Technique

```
student@ubuntu:~$ ./paging.sh
Enter Page Size: 100
Enter Number of Pages: 4
Frame for Page 0: 5
Frame for Page 1: 2
Frame for Page 2: 7
Frame for Page 3: 1
Enter Logical Address: 215
Page Number : 2
Offset : 15
Frame Number : 7
Physical Address : 715
student@ubuntu:~$
```

A terminal window with a black background and white text. The window has three colored window control buttons (red, yellow, green) in the top-left corner. The text shows a user running a script named 'paging.sh'. The script prompts for page size (100), number of pages (4), and then lists frame numbers for each page (Page 0: 5, Page 1: 2, Page 2: 7, Page 3: 1). It then asks for a logical address (215) and calculates the physical address (715) based on the page number (2) and offset (15).
